F2T Gallery is proud to announce “*Lost in the Worlds*”, a group exhibition co-organized with the American collector and gallerist Will NYC, who shares our same passion for art.

For this occasion, we move our gallery to Le Marais, center of the art world in Paris, especially this year during the first edition of Paris+ .

In “*Lost in the Worlds*” 11 international artists are brought together in order to represent landscapes emphasizing different techniques, styles, cultural backgrounds and influences that each of them has.

The representation of natural ambiances has always been an important subject in the art history and an example of how different artists are able to express their own view of the world.

The exhibition take the viewer into a journey without a precise destination where each of us can find elements that reconnect to our own experiences.
